DETAILED ACTION

Allowable Subject Matter

Claims 1-4,7,9-20 are allowed.

The following is an examiner's statement of reasons for allowance: the bifurcated stent having an expandable branch structure that is formed in the wall of the tubular device comprising first and second concentric rings with a transition ring connected with the second ring was found to be novel. The transition ring of the stent also having a discontinuous portion with a connector extending through the ring to the first ring. The stent also having an auxiliary opening between the two rings. The prior art did teach branch structure formed with central stent tubular structures. However, the prior art did not teach concentric rings in the wall of the stent structure that has an auxiliary opening larger than the branch opening. The prior art did teach a connector through a transition ring connected to an inner ring, but did not teach multiple concentric rings that extend outward upon expansion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
